SUMMARY

Electronics and Communication Engineering student with a strong interest in Embedded Systems, automotive Technology, and Industrial Automation. Possesses a solid foundation in hardware technologies internships and academic projects. Eager to contribute to embedded systems and firmware development while technical expertise.

EDUCATION

Bachelor of Engineering in Electronics and Communication Engineering	2023-2027,
KPR Institute of Engineering and Technology	Coimbatore.
Cumulative GPA: 7.60	
Higher Secondary Certificate	2021-2023,
SRV Boys Higher Secondary School	Namakkal.
Percentage: 76.6 %	

INTERSHIP EXPERIENCE

Automation Community [Link]	Dec'25-Feb'26(01-02),
PLC Training for Beginners	Online.
Designed and simulated a PLC-based control system using ladder logic for automation applications such as motor start/stop and water level control using in (Delta ISP Soft / Delta WPL Soft), Entry-level PLC learner.	
Visteon Scholar Program – 12-Week Apprenticeship [Link]	Jan – May 2026,
Your First Step in Tech: Campus to Cockpit – The Future of Automotive Technology	Online.
- Learned gained knowledge automotive Infotainment systems, digital cockpit, Instrument cluster technologies and automotive cybersecurity. - Learned the fundamentals of Embedded Systems, C Programming, firmware development, and microcontroller interfaces including UART, I2C, and SPI, with practical exposure to automotive embedded applications.	

CAPSTONE PROJECTS HIGHLIGHTS

PLC Based Automatic Door Opening & Closing System [Link]
- The main objective of this system is to provide a hands-free, safe, and efficient method of opening and closing doors system consists of key components including a PLC, motion or IR sensor, limit switches, a motor, and a relay. - Ladder Logic, based automation, safety reliability, automation efficiency, manual operation.
CAN Bus Analyzer Dashboard using SocketCAN [Link]
- Developed a Real-Time CAN Bus Analyzer Dashboard using SocketCAN in Ubuntu Linux to monitor and analyze communication between Electronic Control Units (ECUs) over the CAN protocol. - CAN frames in real time using tools like candump and cansend, processes hexadecimal CAN data, and displays message information such as CAN ID, data payload, and timestamps through a dashboard interface.

HACKATHONS & PRESENTATIONS & WORKSHOPS

Hackathon (Infotsav'25) [Unstop]	Online, 2025.
Atal Bihari Vajpayee-Indian Institute of Information Technology and Management, Gwalior, Madhya Pradesh, India.	
Theme of Open Innovation were participated in this challenge, designed a system to detect and alert falls using sensors and real-time monitoring, shortlisted this challenge among 100+ team members, strong problem solving.	
Synopsys (Probe'25) [Link]	India, Tamil Nadu.
National Institute of Technology (NIT), Trichy, India.	
System Verilog for semiconductor design and verification methodologies and RTL and coding EDA Playground knowledge of RTL design, coding, and industry-standard verification methodologies using EDA tools.	

ADDITIONAL SKILLS & TEAM MANAGEMENT

Programming & Scripting: Java, C, Embedded C, PLC Programming, Ubuntu Linux, SocketCAN
Tools & Platforms: CODESYS, Delta ISPSoft / WPLSoft, DOPSoft, COMMGR, Proteus ISIS, AUTOSAR Basics
Certifications & Learning Platforms: Cisco Networking Academy, NPTEL, Maven Silicon, Etalvis
Achievements & Awards: Elite Certif – IIoT 4.0, Elite Certif – Microsensors and Nanosensors
Leadership & Team Management: IETE Member and Placement Coordinator; supported and coordinated 10+ campus placement drives as a volunteer.
Areas of Interest: Embedded Systems, Automotive Communication (CAN Protocol), PLC & Industrial Automation, AUTOSAR, Networking Basics, Electronics Fundamentals.
